

Non-Directive RI Comment Issues

Issues needing discussion with EPA

1. RI Document Outline/Section-by-Section Objectives
2. Linking Sources to In-water Contamination/ Property Names on Maps
3. Identification of Sources/Presentation of Source Information
4. Groundwater/TZW Characterization and Analysis
5. Inclusion of HST and F&T Modeling in Final RI
6. Deletion of Appendix A5
7. Clarifications needed: S343

Issues requiring substantially more work with little technical improvement to the report for early

EPA management discussion

8. S230 – Subsurface core maps
9. S232 – Congener ratios
10. S243 – Surface water results maps
11. S257 – TZW maps
12. S347 – Screening TZW to RBSLs

Issues needing discussion with EPA only if EPA does not agree with our written response

13. Data Lockdown Date
14. Revised RI Document Format/Updated Data Presentations
15. S279 – Background statistical outliers
16. S334 – Stormwater N&E
17. S337 – TZW background
18. S353 – Cr and As in GW to river
19. S356, S360 – Mn in TZW/GW

Issues that do not need further discussion with EPA

20. S280 – Background 95UCL
21. S244 – Phytoplankton
22. S248, S252 – Particulate PCB values
